Although the first version was called AutoCAD Professional, Autodesk later renamed the first release to AutoCAD (not to be confused with the combined CAD/DWG program, AutoCAD LT). In the late 1980s, after the release of AutoCAD version 2, Autodesk released AutoCAD R12 to be compatible with the Macintosh platform, the release of AutoCAD 3, which introduced a new platform (the PC), and the addition of a Windows version. The AutoCAD brand was then extended to include other products. Autodesk announced it would be acquiring the open source software company Corel Corporation. Corel's GIS product, MapInfo, was initially released in 1980. However, after the release of AutoCAD in 1982, MapInfo was adopted as a CAD software platform. After the acquisition, Autodesk announced that Corel's AutoCAD brand would be discontinued, but the application would be renamed AutoCAD. However, this "disconnection" has been questioned.
