Synchronize one or more files from one location to another. Please, look at the projects submitted by our users to understand better how this add-in is going to improve the use of KeePass, as well as your productivity. KeeFusion is the result of an intense period of research on the new features in the beta

version of KeePass 2. The main target was to make the work with the database almost as easy and comfortable as the work using a simple text file. KeeFusion is a small portable application.

KeeFusion is a cross platform open source (MIT License) program that is capable of managing and transforming a wide variety of files. Supports KeePass 2 Beta. (New features added: 1. Support all current database types. 2. Add import/export support for Win32/ANSI databases. 3. Extended import/export support for Win32/ANSI databases. 4. Browse/manage all exported databases. 5. Fast import/export of KeePass Password Safe password and database files. 6.

Support for all KeePass 2 add-ins: StandardKeywords, Keys plus Id's, Tokens plus Id's, ProtectedStrings plus Id's. 7. Easy search for keywords and regular expressions. 8. Auto fill passwords in all database windows). Work with files exported from KeePass 2 is easier, faster and more convenient than ever before. Say hello to your new best

friend. Want to keep your files secure? KeeFusion has been designed to protect your sensitive information in two important ways. First, your file data is encrypted, so nobody can access the information (except you). Second, when KeeFusion is closed, the encryption key is deleted, so nobody can access any information after your KeeFusion session is closed. Clipboard Integration via ClipIt. KeeFusion provides a clipboard handler for all copied text. Import or Export to Klik with KeeFusion was developed to work with the program Klik - Fast File System plugin for KeePass 2. When you are finished with your work with the database, click Cancel to end the export or Import operation, and the file will be opened in the application that you specified in the Klik dialog. Supports Standard, XFire, Memory, Metric and Custom database types. Export to plain text is a practical and convenient way of sharing files.
