We went in March for an art and craft festival and a few weeks ago for another one, they have free entry all week! We visited the old neighbourhood where most of the paintings are located. Our visit was nice but it took me some time to feel the spirit of the old times in Barcelona. But when I saw those paintings I was like "Aah! We are so close!" They also have a conservatorium where they have to improvise every day for the international fair on August. This is our third visit and we could not miss it again. I went to enjoy the street fair that lasts for a week every summer. With tables and lots of stands, you can spend your time reading, enjoying the music and of course, eating. It was so relaxing! They have one of the biggest markets in Europe. It is opened every day of the week. We also visited the monastery that surrounds the monastery. They are so nice! The older people are very nice to us and I felt so close to them, all of them. Some of them are poor so they have to work all the year round so they do not have time to enjoy life.* * The MIT License (MIT) * * Copyright (c) 2014-2018, Erik Moqvist * * Permission is hereby granted, free of charge, to any person * obtaining a copy of this software and associated documentation * files (the "Software"), to deal in the Software without * restriction, including without limitation the rights to use, copy, * modify, merge, publish, distribute, sublicense, and/or sell copies * of the Software, and to permit persons to whom the Software is * furnished to do so, subject to the following conditions: * * The above copyright notice and this permission notice shall be

Import a mark-up into your drawing without touching a single line of code. As you review your mark-ups in Windows Explorer, you'll see the changes reflected in your drawing. (video: 1:05 min.) Markup Assist: Markup Assist is the fastest way to display and navigate mark-ups on paper or other media in your drawings. Rotating marks on paper: Rotate paper and your mark-ups by 90 degrees and display all of your designs in a single, easy-to-read, organized format. Finding marks on paper: Align and locate mark-ups on paper, no matter where they are on the paper. Collapsing multiple marks to a single mark: When working on paper or even other media, use the mark preview pane to quickly collapse marks that you no longer need. Revisiting mark-ups: Bring back any mark-up without leaving your drawing. Resize marks to fit the area: The largest mark in a mark-up is the most prominent, so you can easily adjust its size to fit the area available. Revisiting marks: Revise mark-ups with a new version of the drawing (AutoCAD version change or drawing change), without leaving your drawing. Collaborating on mark-ups: Accept a new drawing version and all of its mark-ups simultaneously. (video: 1:03 min.) Collaborate on Paper: Collaborate on paper by sharing mark-ups with colleagues and clients. They'll see mark-ups on their own copies of the paper. (video: 1:04 min.) References: Viewing Bookmarks: In your drawings, you can identify points in your drawings by using bookmarks. Bookmarks can be placed in any object — from drawings to layers — to identify the point in your drawing that you're viewing. Bookmarks are represented by a red square on the right side of your canvas, and they appear in the same place on all drawing windows and on paper. You can view and edit your bookmarks, and mark them up or down on the fly without leaving your drawing. You can also group bookmarks for increased efficiency. (video: 1:08 min.) Canvas Backgrounds: Select the canvas in the canvas manager to instantly change the color of the canvas background. Just choose
