The company's first product, AutoCAD, was originally released as a desktop application for the Apple II family of computers and early personal computers (PCs). The company acquired Miles Design in 1994 and introduced AutoCAD and other software for the new Personal Workstation (PWS) desktop market. In 1997, Autodesk acquired the program Morphix, a desktop CAD program for the Apple Macintosh. While GRAPHISOFT's products had been Unix-based, Autodesk's products could run on Unix, Mac OS X, and Windows NT. Autodesk products were released for the Windows NT operating system. In 2002, Autodesk acquired Alias|Wavefront, a British-based graphics design company that had also developed Maya, a desktop 3D rendering program. Maya was also developed for Unix and Linux platforms. In 2003, Autodesk acquired The Gimp, a popular open source (libre) image editing application and a free-software version of Photoshop that had been released. In 2005, Autodesk acquired the manufacturing CAD application CATIA (Computer Aided Tool-making for Industry) for \$150 million. CATIA was the first desktop CAD program to allow user-editable parametric solids (faces, edges,
