Once the player's full range of actions are analyzed and recorded, the data then informs how players are forced to react to collisions, tackles, ricochets and more. This dynamic gameplay delivers the next generation of FIFA football gaming. This data also allows you to compare your own player movements against those of the top pros to unlock the best possible player performance and the deepest possible tactics – FIFA Ultimate Team! FIFA 22 also includes real-world player likeness and data – re-imagined player appearances and facial animations powered by the PES PM System. The game also introduces new player types including an Arsenal defender, a Celtic box-to-box midfielder, a Barcelona striker and a Bayern forward, who offer the greatest variety of playmaking abilities. Key Features: COMPETITION PLAYER MOTION CAPTURE "HyperMotion Technology" now uses data from live football matches to provide a more responsive and realistic experience. Data from the motion capture suits worn by 22 real footballers on the pitch is used to inform the way that players react to gameplay and collisions. PLAYER BEHAVIOUR A record-breaking 22 faces have been recorded for FIFA 22, including David Alaba, Douglas Costa and Raphael Varane. CLARITY & VISUAL ANALYSIS The gameplay, player movement and commentary information is overlaid on the players' own movements. DEEPER TACTICS Defensive, midfield and attacking game-planning is now further enhanced, thanks to improved data driven tactics and positioning systems. ENHANCED LIGHTING FIFA 22 is now even more light-reflective than before – keeping you more visible in the spotlight.
