: The Void is one of the most frequently talked-about bands coming out of certain circles of modern noise. Renowned for their insanely complex and turbulent noise rock assaults, driven at maximum volume, The Void have become a dirty, noisy playground of improvs and musical violence that has captured the imagination of a whole new new audience. The Void's first label release, an anthology titled Compudrama, was released in 2008. A year later, they rounded out the trio by landing Norwegians and long-time pals Solitary Turbo Avantgardists as a fourth member. Since then, they have continued to restlessly ferment, disassembling cut-up sound collages into spiral drone madness. The latest release, the Torturing Nature live performance recordings, was released as a double LP in late April to widespread critical acclaim. The Void have returned with three new studio recordings in over seven years. The Fall: Their newest release is their most engaging and eclectic offering yet, sounding as though one might be listening to a post-apocalyptic medieval metal band. Like all of The Void's releases, this latest tape is an avant-flamenco/Eastern European/African infused genre-jungle is as monumental in scope and audacity as their abstract pop-metal experimentalism. Drums and sequencing by Hanne Lagesen (Pangea) with Grete (Greta Olafsen), guitars, bass, steel pan and vocoders by The Void. Recorded in Oslo, Norway in May 2017; Mastered at CD&T on the island of Utøya in July 2017. Produced by The Void and Ryan Greene. Songs by The Void: Hydra. 2018 release Apocalpyto: Whilst the bands history predates them (circa 1996) and it was only a matter of time before they came into their own, The Void have a brilliantly varied and compelling take on psychedelic. The album deals almost exclusively with drugs, drugs in both the spiritual and physical sense (or one of the two). The Void have this thing going on where they take elements from drug-addled rock music, drug-addicted punk rock, drug-addled music and drug-addicted classical music, and blow them up. The Void put you into a drug-addled world where musical textures collide, form dazzling intellectual kaleidoscopes which lend themselves to a variety of imaginative, and at times disturbing, interpretations.
