DEVELOPERS: Game taken from v1.0 of the Special Edition on Steam

ENGLISH CONTROLS: Keyboard, spacebar: Move Mouse: Aim X: Shoot D-Pad: Camera control A/B button: Switch mutation Rotation: Item in hand Targeting cursor: Hold to aim at a surface Shift: Cancel targeting cursor LOCKED

---

**MUTATION:** You must have the objective/background unlocked before you can use locked mutaiton! You get the locked mutation upon successfully completing the game. (Only works in the initial environment, once you have the objective/background unlocked, it starts your mutant state) This is a really awesome game. The game has stunning visuals for a game built on the Unity engine. I couldn't wait to play it and it didn't disappoint! The gameplay is a homage to Metroid. And it's worth saying this game and Metroid share a friend in Zero. I'm really glad to see new developers and indie studios stepping up to the plate. Keep up the good work.

now nothing is going on at the park. They did remove the gas gauges on all the trains...nothing else I can find. Is anyone playing there? If so, where? Always seems like there is one track/speedway open at the park. ^If you check out the far right map on older Speedworld aprons....you'll see all of the park's areas and have a feel of what OPC/SUN/NATURAL Parks looked like as they were evolving. I thought you had already confirmed Wild Mouse. Which speedway actually had Speedworld and Big Ben, as none of those are in the first is visible on the NPS map in the link you posted?(thanks for sharing the image) ^Is it possible that you took a wrong turn and ended up in a different speedway, which is why you couldn't spot the original Speedworld? I know this forum has been taken over in the last year with new owners and stuff...I'm not sure if the latter has anything to do with our private message conversations regarding the OPC section.
