It is an automated system which takes you directly to the most profitable trades with the lowest risk. Assessment of health status of children with congenital heart disease by the general health questionnaire and the international quality of life-children's version. Currently there is no standardized way of assessing the health-related quality of life of children with congenital heart disease. We aimed to evaluate the validity and reliability of a new questionnaire, the international quality of life-children's version (KID-QL), as a measure of health
