UniOne - Mind-bending three-dimensional puzzle with a brilliant concept and simple gameplay. Great graphics, imaginative touch, beautiful abstract shapes. 70+ challenging levels. Hand-crafted multilayer difficulty curve. Optimized for human brain. UniOne is a minimal puzzle with a remarkable concept and beautiful graphics. Work on the edges of the puzzle. UniOne is optimized to be an engaging puzzle that will not tire you out quickly. Enjoy challenging levels with various settings and improve with better and better solutions. Click the empty shapes to change their color. As you play, the shapes will rotate and shake to keep you off balance. Use your brain to work on the edges of the puzzle. Use all your intelligence to reach the solution. The game has 3 modes - Classic, Time Trial and Endless. Easy mode teaches you a lesson. Medium mode will challenge you. Hard mode is about to test your brain power. Different levels have different settings like approach, difficulty and number of moves available. Have fun! A: Note: You have already completed the puzzle. Congratulations! Welcome to the 64th installment of the Series. In this puzzle, each color represents one of the five pieces. If you get stuck, try the following: Move all pieces to the rightmost section of the board to form the outline: Understand that pieces are always red, blue, yellow or green, and that their position is fixed (except in case of flipping). To make the puzzle even more challenging, notice that the colors of the pieces are reversed in some sections. Here is the full outline, including the reversed section: A: You can't get any easier than this; every piece only requires the following moves to solve: Colour Move Move Move Move Move Move Move Putting them together: Pattern: BBBG Solution: BBBB BBBB You can also do this in an endless mode, but it's a bit boring. Phenolics and flavonoids from flaxseed: structure and bioactivity. Flaxseed (Linum usitatissimum L.) is widely used in human nutrition due to its content of high quality proteins (linseeds) and a range of biological and pharmacological properties. Nevertheless, little is known about the components and

8-in-1 IQ Scale is a rhythm game where your goal is to string together power chords and combine them with the moving eight-sided blocks to make the best score that the grid allows. Think Tetris meets Crossy Road. It's addictive and high-energy music as you guide the blocks through the falling columns and the rising bars. The goal in 8-in-1 IQ Scale is to score as many points as you can over the threshold to stop the growing blocks. There are dozens of songs, carefully chosen to match the sound of the music in your playlist. Key Features: - Challenge friends on Facebook - Share high scores on the leaderboards - Play while connected to WiFi or local network - Four different play modes - Over 100 original songs - 23 hand-crafted levels - Use a bluetooth speaker for a truly amazing experience - Easy and intuitive controls - Block movement based on touch screen and accelerometer - Red / Green blocks have different colors and sounds The Soundtracks: "Energy Bed" is the music track used when the game begins. It's a catchy beat that flows effortlessly and quickly through every song in the game. The opening and ending themes are a bit more subdued, but it's basically the same song with a different melody. "Diagonal" is a set of short tracks used when the blocks have been moving along their journey for a while. There's a burst of energy in each song as the blocks speed up for the last final challenge before the big finish. "Flip" is the music track you hear when all of the blocks are moving together toward the finish line. The complete opposite of "Diagonal", there's a sense of urgency as you must cross the finish line to complete the game and the songs get faster and faster! "Jumping" is the music track that's used when the blocks have begun to fall. As the blocks move down, the timbre changes to reflect the descent and the rhythm speeds up to match the falling blocks. "Levels" is the music track that's used when the blocks are reaching the bottom of the grid. Time slows down and the music shifts into a slower tempo, reflecting the perfect place to stop the blocks. What's new in Virtueror: The Virtual Conqueror:

By: ThePhantomPain July 15th, 2013, 10:15 PM Hey everyone! Back with a new review after a probably-over-two year absence and after recently buying Metal Gear Solid V: The Phantom Pain. The assessment had a focus on how player's gender might affect the in-game experiences, as well as what improvements were and how much they came from the Japanese version. A day with a male and female Phantom Pain player surfaced, with both taking to the field, one being alongside the community manager, @TheArmorFather, other being OpenVVV's MagicPikachu08. This was an abnormal me and @TheArmorFather, as most balance changes are included in the game rather than me doing it, but we figure since it was a work day and it's not our turn to work, it was a great excuse to continue this monstrosity of a journey, and we even got BurgerKing involved. Without further ado, the recap of the day we spent playing Metal Gear Solid V: The Phantom Pain. The Date Myself @ThePhantomPain and @TheArmorFather @OpenVVV playing Metal Gear Solid V on the Playstation Vita on Tuesday the 15th of July 2013. Compared to a day of a normal work day, it's a real pleasure for me, as getting that late would've hit a work day with Uni Finals. The date has been pretty exciting, as I got the chance to know someone worth talking to (truly went out of his way to meet me, if I may say so myself), get what was generally the first time I played on the Vita since the 3DS (and judging by the reactions around me, it was mostly playing Castlevania: Lords of Shadow), and eaten a lot. We even got a surprise PS3 controller from Ettan to try out and some coffee from Dairy Milk. The Difficulty When turning the setting down to '0', it feels like you can pretty much cheese across the level, with each level becoming a challenge the longer you advance, other than a few rather tedious hubs. Spreading bullshit whilst providing a challenge is one of the best ways to sell the game, right? Also, it's nice they've put a lot of effort into describing the levels in a way that less likely to be true in-game, such as stating they're easy... only to have you grinding your ever-lovin'
