Q: Unable to install IPython in Microsoft Windows 10 I am trying to install IPython 0.13.1 on Windows 10 but I'm getting the following error when I import IPython ImportError: DLL load failed: The specified module could not be found. I'm using the 64 bit Python 2.7.13 on the 64 bit of Windows 10. A: After a lot of searching, I found out that IPython do not play well with Windows 10 and that a 32 bit machine might be required. My workstation is currently a 64 bit machine so that's the reason why it wasn't working. If you're using Windows 7, you can try switching to Windows 10 and installing 32 bit Python. Update After a lot of deliberation I have decided to stick with Windows 7 for my daily use so I'm going to

stick to 32 bit Python along with IPython. This is because I still have access to my C++ software which was written using Visual Studio 2010 and it's available for Windows 7 only.
