While I recommend that everyone using 64-bit architecture stick with the 64-bit version, 32-bit is an option. 32-bit architecture is quite a bit slower than the 64-bit version, but it will run better on most machines and on most 32-bit programs. While the 32-bit version is slower than the 64-bit architecture, the biggest advantage to the 32-bit architecture is that many older versions of software are still available. This is particularly important for organizations that need to use older versions of software. Xforce Autodesk Inventor is an easy to use application that will allow you to design and simulate real-world projects, such as bridges and commercial buildings, and then produce three dimensional geometry. The 3D geometry generated by Xforce Inventor can be exported to any file format including DXF, DWG, DWG2, STL, and OBJ. Xforce Autodesk Inventor comes with robust features, including visual modes that are intended to allow novice users to be productive without a high level of knowledge. This is also an application that is highly integrated with other Autodesk applications, including Autodesk Architectural Desktop. The files generated by Xforce Inventor can then be exported to virtually any other Autodesk application using the same interface that was used to generate the geometry. Xforce Autodesk Inventor 2008 If you are planning to work in an AEC industry, Xforce Inventor is a must have program. This is the one tool in your office that will allow you to take advantage of all of the functionality that is built into Autodesk Architectural Desktop. When compared to other CAD programs, Xforce Inventor is feature rich and allows you to bring a level of detail and structural rigor to any project. Building upon the success of the previous version, Xforce Inventor 2008 includes several new enhancements and improvements. Conventional 2D views have been replaced with 3D visual views, which includes a comfortable 3D walkthrough capability and an overhead view. Visualizations have been enhanced in Xforce Inventor. There are now a more natural amount of visual settings that allow the user to make model transformations. There are now new views that provide information about the type of building and the amount of materials that will be required. There are a couple of improvements to the Viewports. The Standard and Inherit views have been 6d1f23a050
