What's New In?

Where Is It? is a tool designed to help you organize a list of contents found in your hard disks, removable drives, audio CDs, and so on. Once you initiate the application with the user-friendly interface, you can use the quick setup wizard to get started. So, you can select your preferred language, the default location for catalog files, create backup files when saving catalogs, enable browsing inside compressed files and set a list of file types to ignore when performing a disk scan (e.g. zero-sized or hidden files). You can create a new empty catalog, one based on a template or another catalog, after which you will be able to add a new disk or disk group. Here you can add content from a local hard drive, network drive or ISO file and configure disk image settings - browse inside compressed files, calculate CRC codes for all scanned files, import existing descriptions from other disks in the catalog, and more. Furthermore, you can create as many disk groups as you wish, enable "Folder limitations", assign images to the catalogs or their subcategories, keep a record of discs you exchange with your friends, import movie information from the online platform, and more. The program uses a moderate-to-high amount of system resources, contains a very resourceful help file (with screenshots) and, except for the fact that it temporarily froze when we selected "Network Drives", Where Is It? has a great response time. Since this software comes to the aid of both beginners and power users, we strongly recommend it. Where Is It? - English Screenshots: Where Is It? - Help: Where Is It? - Full version download: Where Is It? - Free Download Download Links: 100% Safe and Legit Download Links (No Fake Download) Software Features: Help: Where Is It? Review: What is new in this release: 1.1.2: Fixed: 1.1.1: What is new in version 1.1: Completely new interface - It is now possible to setup the application in the same way as before (system configuration wizard, creation of new catalogs, viewing of existing catalogs and creation of new groups and contents in them) and the process is easier than before. New autostart mode - You can now configure the application to start automatically after the system starts. New text in the menu: "Run as administrator" - it is now possible to run the program in the same way as in previous versions. Full control of the program - If you are using the program for the first time, you can make changes to the system configurations, create a new catalog and add files to it without having to open the system settings wizard each time. You can now

System Requirements:

Adobe Flash Player Version: Win x86 (32-bit), Win x64 (32-bit), or Mac OS x86 (64-bit) Operating System: Mac OS X 10.6, 10.7 or 10.8 Processor: 2GHz Intel or 2.5GHz Intel or 3GHz Intel Memory: 512 MB RAM Video Card: 1024 MB RAM DirectX Version: 9.0c
