Now that's a 3D modeling masterpiece, isn't it? Just create your hands and then move them into the scene with your mouse. I used red for my right hand and blue for my left, but feel free to use whatever colors you like, as long as you make them look like real people. Microsoft and Sony are reportedly in talks about a joint effort to produce a free version of Windows 8, which would be a superset of Windows 8 Pro, and less expensive. Windows 8 Pro has always been the full version of the software, and the idea is to create a version of Windows 8 that's less expensive, and that would allow people to get on

with their day. Now, Microsoft has faced a lot of criticism over the last year or two over the fact that Windows 8 is so expensive, and that's even though Microsoft's CEO has said that it's worth the money. Microsoft is forced to make their software a lot more expensive for the fact that it has to support modern operating systems, and the reality is that people are actually paying more for Windows 8 than they should, and we can see the consumer price on some laptops. In addition to the consumer market, businesses are also forced to make a decision on whether or not to purchase Windows 8 Pro, and it's a big decision, because Microsoft is wanting to make sure that businesses

get the full version of the software. However, in order for this to happen, both Microsoft and Sony are reported to be in talks over the possibility of making a free version of Windows 8, and that would be Windows 8 Lite. Windows 8 Lite will be less expensive than Windows 8 Pro, and it'll be based on Windows 7. This version of Windows 8 would be something that would allow Windows 8 Pro users to get on with their day, but it would be free of the licensing costs that Microsoft and Sony have to bear on Windows 8 Pro. However, it's not clear whether or not Windows 8 Lite will be able to run on any machines, and the company behind the software may have a lot of code written

specifically to work on the software. The other side of the coin is that a lot of people have a lot of machines with Windows 7 already, and they may be able to run Windows 8 Lite without any issues. It's also worth pointing out that this version of Windows 8 Lite may not be able to connect to any Microsoft-only services that are not available in Windows 8. Windows 8 Lite will be less expensive
