It's dated June 2017. It doesn't require a serial key to be installed. I know I could take the exe installer I have and use it to create a new serial number for my copy of Nero, but I have 3 different users I want to assign. Can someone help me? Thanks. Barbar I would recommend you to use a backup application which allows you to restore your ISO or CD/DVD image in case anything happens. If Nero doesn't offer such functionality, you should consider creating a bootable USB device. There are some online resources to help you learn how to create bootable USB drives. If you have a legit, legit copy, you can activate it. If you don't feel comfortable with burning, unzip to your desktop the downloaded Nero setup file to get a setup.exe file. You can then open the setup.exe file and activate it. You can also download the ISO to your hard drive, and just burn the ISO file from there. You can use a drag and drop file converter to easily convert zip files to ISO Revo Uninstaller Did you check the Nero website or in the package you downloaded. If this was not a Nero website that the download was from there should be an option to check a checkbox that will remind them not to use a key to activate the download. After you download it you can open it in winrar and make sure it is not from that site you have been directed to. You could also try
