
AetherMD - NaruSasu Lovers X Rivals Naruto HJ .swf [BEST]

This works as a draw tool. With certain programs, you can draw, then fill or outline your drawing, making it appear like its creating the magic. They work in the same way for InkScape, but the back and forth process is a bit more long-winded. You have to use the Live Paint tool to load the image that you want to use and then use the Brush tool to paint. Do keep in mind that your image will appear as a layer in the drawing. If you try to remove the image while the layer is in the drawing, the layer will stay there and you will have to recreate it.
