## Wincc Flexible 2008 Sp4 Update

[Download](#)

WinCC Flexible-2008 SP4 is HMI design software exclusively for the Chinese market (equivalent to 2008 SP5 for international versions). The program allows you to design and manage the human-machine interface. Unlike WinCC Flexible-2008, which runs on WinCC (version 2008 and higher), WinCC Flexible-2008 SP4 can run on WinCC Flexible-2007. To get started, select "Add Library" from the drop-down menu in the upper right corner

---

of the WinCC Flexible-2008 window (after installation). To access the library, on the WinCC desktop, on the right sidebar, select "Library".

---
