But we are also seeing a rise in SaaS due to the fact that businesses are increasingly moving to hybrid cloud deployments for a number of reasons – most importantly, to minimize the operating expenses as well as to reduce the management costs. The modern enterprises, on their part, are finding hybrid cloud solutions from service providers such as Pivotal, Telerik, and Red Hat quite useful and advantageous. If you are looking for a similar solution that you can use, you can take a look at Red Hat OpenShift Enterprise for Kubernetes, which is a PaaS that helps enterprises to deploy containers, orchestrate them, and run them in the cloud.
