Since Artistic and B&W images lack in a certain way when it comes to color, the color space feature allows you to set the color space used to create your image. The default is sRGB (or sRGB recommended), while Pro Photo RGB and Adobe RGB are other options. Adobe's most recent press photo, showing the lineup of new tools, is an interesting one. The new features include smart object masking with layers, manual and automatic healing tools, retouching specialist and brush support, and a reticule and brush stroke zoom tool.
