This is a powerful and feature-packed sound control and volume manager for Windows 8/8.1/10. It allows you to set the volume of your PC speakers and headphones; monitor audio levels using on-screen display or the Volume mixer; and more. Relax, you're just a few mouse clicks away from an improved audio experience. This Windows app lets you change the volume of your computer speakers and headphones, control whether or not your computer's audio speakers are muted, as well as display your PC's audio levels in an

on-screen mixer. This app also has a scheduler that can be set up to run tasks. The scheduler will periodically adjust your audio settings (which includes speaker volume, playback volume, and balance) to be sure that you get the best sound experience possible. You can even monitor audio levels and mute your speakers with this app. It is not an integrated app, but it can be used along with other apps, such as volume control software, as a timer and alarm clock, and more. Download Volume² Windows, it's totally free and easy to install. You can install this program on your computer for free, and it's

compatible with Windows 8/8.1/10. Please read the license before using this product. Do not share or distribute this product to others. General: - The latest version of Volume² is available to download free of charge on the official website. - The app can be installed on any computer, regardless of whether or not it has the latest version of Windows. - In the event that you encounter any problems whilst using this app, please contact the company. - In order to do so, please visit the contact page on the official website. - You are allowed to use this program for free on one computer. - Before you

install, please make sure that you have read the license and understand the terms and conditions. - Note: This product includes some optional/customized/provided third-party components. Overview: You are currently viewing the free version of Volume². This program is completely free and does not include any adware, spyware, or other malicious software. It is 100% safe to use. The features of this app include: - It provides you with an on-screen mixer. - You can easily change your computer's audio settings. - You can monitor audio levels.

**What's New In?**

Volume² is a tool that provides users with quick and easy access to your computer's audio volume settings. Version: 1.1.0.1 Remove Ads Similar software shotlights: MSN Volume Booster 2.2Publisher's description MSN Volume Booster is a program developed by Windows Mobile Studio. After our trial and test, the

software is proved to be official, secure and free. Here is the official description for MSN Volume Booster: MSN Volume Booster uses the Windows Media Player. It allows you to set the volume for your WMP without any conflict of settings among WMP, MSP and MSN. The MSN Volume Booster function is developed for WMP, and this is not the exclusive function of this software. WMP is a WINDOWS APPS, just like as MSN. MSN Volume Booster is only a very useful function for us. Besides, MSN Volume Booster will improve the MSN program by showing a black screen while WMP plays

music. But in the MSN you can not see MSN volume, MSN Icons, your custom WMP player. Thus you will know exactly the volume of your WMP. MSN Volume Booster not only shows the volume level of WMP, but also shows the volume level of Windows Media Player. MSN Volume Booster is a program developed by Windows Mobile Studio.
